SnO_2 Gas Sensors

SnO_2 sensors: current status and future prospects. 1
W. Göpel, K.D. Schierbaum (Tübingen, Germany)

A.c. measurements on tin oxide sensors to improve selectivities and sensitivities 13
U. Weimar, W. Göpel (Tübingen, Germany)

The effect of additives in tin oxide on the sensitivity and selectivity to NO_x and CO 19
I. Sayago, J. Gutiérrez, L. Arés, J.I. Robla, M.C. Horrillo, J. Getino, J. Rino, J.A. Agapito (Madrid, Spain)

Selective detection of CO and CH_4 with gas sensors using SnO_2 doped with palladium 24
G. Tournier, C. Pijolat, R. Lalauze (Saint-Etienne, France), B. Patissier (Lyon, France)

Copper-doping level effect on sensitivity and selectivity of tin oxide thin-film gas sensor 29
A. Galdikas, A. Mironas, A. Šetkus (Vilnius, Lithuania)

Electrical properties and improvement of the gas sensitivity in multiple-doped SnO_2 33
G. Behr, W. Fliegel (Dresden, Germany)

Sintering, catalytic effects and defect chemistry in polycrystalline tin dioxide 38
M.S. Dutraive, R. Lalauze, C. Pijolat (Saint-Etienne, France)

The temperature dependence of the response of SnO_2-based gas sensing layers to O_2, CH_4 and CO 45
N. Bârsan, A. Tomescu (Bucharest-Măgurele, Romania)

Capacitance effects and gaseous adsorption on pure and doped polycrystalline tin oxide 49
M. Labeau, U. Schmatz, G. Delabouglise (Saint Martin d'Hères, France), J. Roman, M. Vallet-Regi (Madrid, Spain), A. Gaskov (Moscow, Russia)

A study of the moisture effects on SnO_2 thick films by sensitivity and permittivity measurements. 53
G. Martinelli, M.C. Carotta, L. Passari, L. Tracchi (Ferrara, Italy)

Long-term reliability of sensors for detection of nitrogen oxides 56
I. Sayago, J. Gutiérrez, L. Arés, J.I. Robla, M.C. Horrillo, J. Getino, J. Rino, J.A. Agapito (Madrid, Spain)

Contact and sheet resistances of SnO_2 thin films from transmission-line model measurements 59
U. Hoefer, K. Steiner, E. Wagner (Freiburg im Breisgau, Germany)

Laser annealing of SnO_2 thin-film gas sensors in single chip packages 64
K. Steiner, G. Sulz, E. Neske, E. Wagner (Freiburg im Breisgau, Germany)

Semiconducting Gas Sensors

TiO_2 anatase thin films as gas sensors 71
H. Tang, K. Prasad, R. Sanjinés, F. Lévy (Lausanne, Switzerland)

Description and characterization of a hydrogen sulfide gas sensor based on $Cr_{2-y}Ti_yO_{3+x}$ 76
D.H. Dawson, G.S. Henshaw, D.E. Williams (London, UK)

Elsevier Science S.A.

Sensitive, selective and stable CH_4 detection using semiconducting Ga_2O_3 thin films 81
M. Fleischer, H. Meixner (Munich, Germany)

Comparison of a.c. and d.c. measurement techniques using semiconducting Ga_2O_3 sensors 85
M. Fleischer, V. Wagner, B. Hacker, H. Meixner (Munich, Germany)

WO_3 sputtered thin films for NO_x monitoring 89
G. Sberveglieri, L. Depero, S. Groppelli, P. Nelli (Brescia, Italy)

High temperature oxygen sensor based on sputtered cerium oxide 93
J. Gerblinger, W. Lohwasser, U. Lampe, H. Meixner (Munich, Germany)

Nitrogen oxide sensors based on thin films of $BaSnO_3$ 97
U. Lampe, J. Gerblinger, H. Meixner (Munich, Germany)

Temperature characteristics of electrical properties of (Ba,Sr)TiO_3 thick film humidity sensors 99
J. Holc, J. Slunečko, M. Hrovat (Ljubljana, Slovenia)

Comparison of the water effect on the resistance of different semiconducting metal oxides 103
F. Réti (Budapest, Hungary), M. Fleischer, J. Gerblinger, U. Lampe (Munich, Germany), E.B. Várhegyi, I.V. Perczel (Budapest, Hungary), H. Meixner (Munich, Germany), J. Giber (Budapest, Hungary)

Oxygen interaction of CdS-based gas sensors with different stoichiometric composition 108
V. Golovanov, V. Smyntyna (Odessa, Ukraine), G. Mattogno, S. Kačiulis (Rome, Italy), V. Lantto (Oulu, Finland)

Oxygen adsorption–desorption effect on the electrical properties of a-Si:H layers. 113
M. Aoucher, T. Mohammed-Brahim (El-Alia, Bab-Ezzouar, Algeria), C. Bodin, D. Mencaraglia (Gif-sur-Yvette, France)

Thin-film $ZnSe_xTe_{1-x}$/ZnSe oxygen sensitive structures 116
V.M. Skobeeva, A.K. Dali (Odessa, Ukraine)

Polymer Gas Sensors

Silicon-containing monomers, oligomers and polymers as sensitive coatings for the detection of organic solvent vapors 121
R. Zhou, U. Weimar, K.D. Schierbaum, K.E. Geckeler, W. Göpel (Tübingen, Germany)

Polymer-based sensor arrays and multicomponent analysis for the detection of hazardous organic vapours in the environment 126
A. Hierlemann, U. Weimar, G. Kraus, M. Schweizer-Berberich, W. Göpel (Tübingen, Germany)

Integrated array sensor for detecting organic solvents 135
J.W. Gardner, A. Pike (Coventry, UK), N.F. de Rooij, M. Koudelka-Hep, P.A. Clerc (Neuchâtel, Switzerland), A. Hierlemann, W. Göpel (Tübingen, Germany)

Nitrogen dioxide detection using low-conducting Langmuir–Blodgett films. 140
H. Perez, W. Budach, S. Palacin, G. Derost, A. Barraud (Gif-sur-Yvette, France)

Elaboration and tests of microelectronically designed gas sensors with phthalocyanine sensitive layers. 144
C. Maleysson, M. Passard, J.P. Blanc, V. Battut, J.P. Germain, A. Pauly (Aubière, France), V. Demarne, A. Grisel (Neuchâtel, Switzerland), C. Tiret, R. Planade (Vert-le-Petit, France)

Semiconductivity and gas-sensing properties of crown-ether-substituted lutetium bisphthalocyanines. 150
P. Bassou, T. Toupance, J. Simon (Paris, France)

Detection of low hydrogen concentrations by a Cu–Pc sensor. 153
V. Uwira, A. Schütze, D. Kohl (Gießen, Germany)

Clathrates as coating materials for dielectric transducers with regard to organic solvent vapour sensors. 158
K. Buhlmann, J. Reinbold, K. Cammann, A.A. Shul'ga, C. Sundermeier, M. Knoll (Münster, Germany), A. Wierig, E. Weber (Freiberg, Germany)

FET Gas Sensors

Gas sensitive field effect devices for high temperatures 165
A. Baranzahi, A. Lloyd Spetz, B. Andersson, I. Lundström (Linköping, Sweden)

Two-dimensional numerical simulation of semiconductor gas sensors 170
Z. Gergintschew, H. Förster, J. Kositza, D. Schipanski (Ilmenau, Germany)

Influence of surface modifications on semiconductor gas sensor behavior 174
E. Souteyrand, D. Nicolas, E. Queau, J.R. Martin (Ecully, France)

Acoustic Gas Sensors

Versatile microcontrolled gas sensor array system using the quartz microbalance principle and pattern recognition methods 181
J. Auge, P. Hauptmann (Barleben, Germany), J. Hartmann, S. Rösler, R. Lucklum (Magdeburg, Germany)

SAW gas sensors: comparison between delay line and two port resonator 187
A. Mauder (Munich, Germany)

Detection of CO_2 using a quartz crystal microbalance 191
M.T. Gomes, A.C. Duarte, J.P. Oliveira (Aveiro, Portugal)

Acoustic sensor for ternary gas analysis 195
L. Zipser, F. Wächter (Dresden, Germany)

Supramolecular receptors for SAW and QMB devices: solvent recognition evaluated by FT-IR spectroscopy and BET adsorption analysis. 199
F.L. Dickert, U. Geiger, M. Keppler, M. Reif (Vienna, Austria), W.-E. Bulst, U. Knauer, G. Fischerauer (Munich, Germany)

Self-assembled monolayers of supramolecular compounds for chemical sensors 203
T. Weiß, K.D. Schierbaum (Tübingen, Germany), U. Thoden van Velzen, D.N. Reinhoudt (Enschede, Netherlands), W. Göpel (Tübingen, Germany)

Soluble phthalocyanines for the detection of organic solvents: thin film structures with quartz microbalance and capacitance transducers 208
Z.Z. Öztürk (Tübingen, Germany and Grebze Kocaeli, Turkey), R. Zhou, U. Weimar (Tübingen, Germany), V. Ahsen (Gebze Kocaeli, Turkey), Ö. Bekaroglu (Istanbul, Turkey), W. Göpel (Tübingen, Germany)

Pressure modulation for testing piezogravimetric gas sensors 213
F.J. Auerbach, A. Seeger (Munich, Germany)

A new theory of adsorption for the quantitative description of gas sensors. 217
M. Horn (Neubiberg, Germany)

Please note that the page numbering for these Proceedings is continuous throughout Volumes B26 and B27, and Author and Subject Indexes will be published at the end of Volume B27.

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
